

There are some opportunities for planting a native tree at the burial ground:-

Inside the burial glades, there are a few select positions close to the edges, where trees can be planted, or we can replace trees that have fallen. New trees are bare-root saplings, planted in the winter months and guarded by a tree-tube guard and stake to help protect against being nibbled by wildlife.

A horticultural style 'tree label' is provided to be displayed at the base of the tree inscribed with the details given below. The labels will be displayed for an initial period of 10 years (due to the projected lifespan of the materials), and you will have the option to renew/extend the periods at the end of this term.
